# **EGD Method Training (EMT) System**

**Anymedi Trainers**

Anymedi is a solution applier and software developer, focusing on patient & surgeon-specific medical devices **powered by AI**.  
Based on **700+ clinical cases**, we provide global on-line service from medical image labeling to surgical visualization through our own cloud platform.

## EGD Method Training (EMT) System

### Selected Features

- ✓ Provide total education system based on a SHT for endoscopic handling training, an EGD simulator simulating upper GI, and an evaluation software.
- ✓ Suitable for learning technical skills safely and efficiently.
  - Designed like realistic appearance, anatomical structure and texture of an upper GI.
  - Enabling to train with the procedure as the actual endoscopy: pass through the mouth, oral cavity, laryngeal region, esophagus, gastric antrum, duodenum and gastric angle.
- ✓ Preventing instrumental perforation of the esophagus and endoscopic damage from manipulation immaturity.
